

PF-63-060(B) SPECIFICATION SHEET PUMP PACKAGE SYSTEM

Features:

- Removes particulate as low as 45 microns
- 150 psi working pressure
- Fully assembled skid package
- One year limited warranty

Options:

- Removable dome separator
- 22 1/2° Profile separator
- Coated carbon steel piping
- Isolation valve kit
- Dry contact for alarm

SYSTEM COMPONENTS

SPECIFICATIONS	PF-63-060(B)
Flow Rate	1200 GPM
System Inlet Connection	8" Flg
System Outlet Connection	6" Flg
Recovery Vessel Model	PF-RV-1S
Separator Model	PF-61-060
Separator Purge	Continuous
Pump Motor	25 HP
Volume	51 GAL
Est. Weight, Dry	1858 lbs
Est. Weight, Operating	2277 lbs

Separator :

- PF-61 Series separator
- Fusion-bond polyester coated vessel
- Manual air bleed valve
- Inlet/Outlet pressure gauges

Electrical Controls :

- UL labeled control panel with NEMA 4X Enclosure
- Door disconnect switch
- Short circuit and Motor overload protection
- Hand-Off-Auto switches

Pump :

- Centrifugal pump
- TEFC motor
- Cast iron pre-strainer

Recovery Vessel :

- 304 Stainless steel vessel
- Pressure differential indicator
- Automatic flow controller

Skid :

- Fusion-bond polyester coated carbon steel

Interconnecting Pipe :

- Sch.80 PVC piping

NOTES: UNLESS OTHERWISE SPECIFIED

1. DIMENSIONS ARE IN INCHES
2. DIMENSIONS MAY VARY SLIGHTLY - DO NOT USE FOR CONSTRUCTION
3. SEPARATOR SYSTEM IS RATED FOR 150 PSI WORKING PRESSURE

 "AUTO" - FILTER ON/OFF VIA REMOTE STOP/STOP

WARNING

If an overload or fault current interruption occurs, circuits must be checked to determine the cause of the interruption. If a fault condition exists, the current carrying components should be examined and replaced if damaged, and the integral current sensors must be replaced to reduce the risk of fire or electric shock.

CAUTION - RISK OF ELECTRICAL SHOCK

More than one disconnect switch may be required to de-energize the equipment before servicing.

WARNING - RISK OF FIRE OR ELECTRIC SHOCK

The opening of the branch circuit protective device may be an indication that a fault current has been interrupted. All current carrying parts and other components protected by this device should be examined and replaced if damaged. If burnout of a current element of an overload relay occurs, the complete overload relay must be replaced.
